a i k a t a

A stainless steel sauce pan with double spouts 18cm Edelstahl-Stieltopf mit doppeltem Ausgießer 18cm

It is a single handed sauce pan used frequently in daily cooking.
The strong and easy to clean sauce pan made of stainless steel has characteristics spouts.
It is easy to use and stress free without dropping sauce when serving.

Eine Kasserolle mit einem Stiel, häufig beim täglichen Kochen verwendet.
Der stabile, leicht zu reinigende Stieltopf aus Edelstahl verfügt über die charakteristischen Ausgießer.
Einfach zu benutzen und stressfreies Servieren ohne zu tropfen.

POINT The shape of spouts

The shape of spouts are proudly designed and made. You can serve foods neatly without dropping from the side edge or dropping out to the bottom of the pot. It is easy to serve soup, stew and so on.

Punkt Die Form der Ausgießer

Die Ausgießer sind durchdacht geformt. So können Sie Speisen servieren, ohne Soße zu verkleckern oder Flecken zu machen. Perfekt zum Servieren von Suppen, Eintöpfen etc.

POINT Body

It has moderate rounded shape to make sauce convection in the pan for cooking your delicious food.

Punkt Gehäuse

Durch die sanfte Rundung erhält die Sauce die perfekte Hitze für Ihr köstliches Essen.

Sold separately / Verkauf separat

A lid for a stainless steel sauce pan with double spouts Deckel für Edelstahl-Stieltopf mit doppeltem Ausgießer

POINT The lid can control steam

The lid shape is in line with the pan's shape, so you can get rid of steam from a spout opened by sliding the lid and prevent water overflow.

Punkt Der Deckel kann den Dampf kontrollieren.

Die Form des Deckels entspricht der Form des Topfes; Sie können den Dampf durch einen Ausgießer entweichen lassen, indem sie den Deckel verschieben und so verhindern, dass Flüssigkeit überkocht.

The flat shaped knob keeps the lid stable without rolling when the lid is placed on.

Durch den flachen Knauf liegt der Deckel stabil und rollt nicht hin und her.

Unique Iron Deep Frying Pan

鉄製揚げ鍋

The spout serves as a convenient tool to transfer oil after use.

catalog

GOOD
DESIGN

Oval-shaped allows for deep frying even with small amount of oil.

A small but deep side prevents splattering and oil splashes during cooking. Both handles provide a firm grip, and the easy-pour spout makes oil transfer a breeze.

Compatible with both gas and induction stoves.

A large, wide spout makes it easy to transfer the oil after use.

The deep body guards against oil splattering during cooking. (Depth: approx.10cm).

Oil volume guide line
500ml, 800ml.

Use as a guide when adjusting oil volume according to the appliance to be heated or the scene.

Surface treatment / silicone coating.

Dimensions: 205 x 160 mm (internal dimensions)

Type of material / Iron (bottom thickness: 1.6 mm)

Full water capacity / 2.2L.

The extremely fine mesh allows it to effectively scoop up even the smallest particles such as crumbs from frying powder.

The elongated handle provides reassurance for deep-frying dishes. The fine mesh of the skimmer is effective in capturing even the smallest debris. You can confidently cook fried dishes without the worry of mess from debris.

The oval shape with a broad surface allows for ample scooping, making it easy to gather a generous amount.

A carefully crafted kettle for a cup just for you.

NEW PRODUCT

a i k a t a Stainless Kettle

**A kettle for enjoying
your personal moments.**

The aikata series stainless kettle is designed with a feature that ensures clean, drip-free pouring. Its spout is meticulously crafted to regulate the water flow, whether you require a gentle stream or a more generous pour.

The wooden handle and knob are crafted from a welcoming, smooth wood that offers a comfortable grip.

It's a kettle that turns even the time it takes for the water to boil into an enjoyable moment, enriching our daily lives.

日本製

a i k a t a

TSUBAME SANJO / YOSHIKAWA

 GOOD
DESIGN

It is a spout designed with attention to detail, allowing for a fine stream of pouring. A specially designed spout shape that makes it easy to adjust the water flow or volume.

The holes inside the main body are designed to easily adjust the water flow when pouring, and to prevent boiling over and splashing of hot water during boiling. Since the main body has no rolled edges, water drains off completely after use, allowing for clean and hygienic usage.

Furthermore, the wide-spout body is easy to clean and ensures hygienic use.

To ensure stability during use, the handle is designed to lock in place when lifted, eliminating any wobbling, providing peace of mind during use.

The shapes of the main body and lid are designed so that the lid does not fall off even when tilted greatly.

Compatible with both gas and induction stoves.
