A stainless steel sauce pan with double spouts 18cm

It is a single handed sauce pan used frequently in daily cooking. The strong and easy to clean sauce pan made of stainless steel has characteristics spouts. It is easy to use and stress free without dropping sauce when serving.

POINT The shape of spouts

The shape of spouts are proudly designed and made. You can serve foods neatly without dropping from the side edge or dropping out to the bottom of the pot. It is easy to serve soup, stew and so on.

POINT Body

It has moderate rounded shape to make sauce convection in the pan for cooking your delicious food.

POINT Handle

Well-designed curved wooden handle allows easy- to-hold. It is a gentle warm wooden handle with good touch. Flavor of balance both stainless and wood pulls out its quality fascinatingly.

Body/Stainless steel (Thickness=1.0/mm) Handle/Natural wood

Sold separately

A lid for a stainless steel sauce pan with double spouts

POINT The lid can control steam

The lid shape is in line with the pan's shape, so you can get rid of steam from a spout opened by sliding the lid and prevent water overflow.

The flat shaped knob keeps the lid stable without rolling when the lid is placed on.

Unique Iron Deep Frying Pan

鉄製揚げ鍋

The spout serves as a convenient tool to transfer oil after use.

GOOD
DESIGN

Oval-shaped allows for deep frying even with small amount of oil.

A small but deep side prevents splattering and oil splashes during cooking. Both handles provide a firm grip, and the easy-pour spout makes oil transfer a breeze.

Compatible with both gas and induction stoves.

A large, wide spout makes it easy to transfer the oil after use.

The deep body guards against oil splattering during cooking. (Depth: approx.10cm).

Oil volume guide line 500ml, 800ml.

Use as a guide when adjusting oil volume according to the appliance to be heated or the scene.

Surface treatment / silicone coating.

Dimensions: 205 x 160 mm (internal dimensions)

Type of material / Iron (bottom thickness: 1.6 mm)

Full water capacity / 2.2L. **MADE IN JAPAN**

Stainless Fine Debris Skimmer

4979487 330244 / PD3024

18-8stainless steel
SIZE W89×H275mm
72g
Dishwasher safe

The extremely fine mesh allows it to effectively scoop up even the smallest particles such as crumbs from frying powder.

The elongated handle provides reassurance for deep-frying dishes. The fine mesh of the skimmer is effective in capturing even the smallest debris. You can confidently cook fried dishes without the worry of mess from debris.

The oval shape with a broad surface allows for ample scooping, making it easy to gather a generous amount.

a i k a t a

Stainless Skimming Net

4979487 330251 / PD3025

18-8stainless steel
SIZE W100×H306mm
85g
Dishwasher safe.

Quickly scoop up boiled and fried items with ease. The mesh design ensures efficient draining of water and oil for a clean result.

Suitable for both boiling and frying. The generous skimming net and the longer handle provide reassurance for confident and convenient cooking.

The skimming net is constructed using spark mesh material, where all intersecting points are securely welded.

A carefully crafted kettle for a cup just for you.

aikata Stainless Kettle

A kettle for enjoying your personal moments.

The aikata series stainless kettle is designed with a feature that ensures clean, drip-free pouring. Its spout is meticulously crafted to regulate the water flow, whether you require a gentle stream or a more generous pour. The wooden handle and knob are crafted from a welcoming, smooth wood that offers a comfortable grip.

It's a kettle that turns even the time it takes for the water to boil into an enjoyable moment, enriching our daily lives.

**GOOD
DESIGN**

a i k a t a

T S U B A M E S A N J O / Y O S H I K A W A

 **GOOD
DESIGN**

It is a spout designed with attention to detail, allowing for a fine stream of pouring. A specially designed spout shape that makes it easy to adjust the water flow or volume.

The holes inside the main body are designed to easily adjust the water flow when pouring, and to prevent boiling over and splashing of hot water during boiling. Since the main body has no rolled edges, water drains off completely after use, allowing for clean and hygienic usage.

Furthermore, the wide-spout body is easy to clean and ensures hygienic use.

To ensure stability during use, the handle is designed to lock in place when lifted, eliminating any wobbling, providing peace of mind during use.

The shapes of the main body and lid are designed so that the lid does not fall off even when tilted greatly.

Compatible with both gas and induction stoves.

Aikata Stainless Steel Container

Our goal is to create a functional yet beautiful design

Made of stainless steel for high corrosion resistance and cleanliness. With this design, we sought to create a piece with such a unique character that even scratches and dents would become part of the piece's character.

Rather than simply making stainless steel containers, we placed a great deal of emphasis on design and functionality. We hope that the use of these containers will lead to the reduction of food loss and waste.

Stainless steel container 6 key points for ease of use

Packing is Easy-to-wash.
Prevents leakage of juices.
Attach and detach for easy cleaning.

Safe structure that opens the lid even when it is tightly sealed.
The lid can be easily opened by pressing the protrusion on the packing section.
Lid can be easily opened.

Can be stacked on top of each other.
Stackable on lid for easy transport.
It takes up little storage space.

Dirt-free edge shape.
The edges of the lid and body are not curled, so that dirt does not accumulate and the lid is easy to wash.

Slanting mortar shape.
The narrow bottom fits securely in the palm of the hand for easy holding, and the wide top allows for beautiful serving without crushing the food.

Made of highly durable stainless

Resistant to deformation, odor and color migration, and easy to clean.

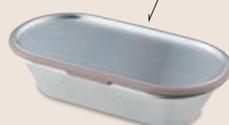

The narrow bottom makes it easy to hold with one hand and is recommended for lunch at the bench. It can be used to make leftover food, fill it with ingredients, and carry it with you outdoors. Two types are available, one with a stopper and the other without. You can use it in different ways depending on the scene of use.

With stopper Key Point

Brackets are attached to the lid to prevent clanking when the unit is in use. You can use it as a storage container on your table cleanly.

Without Stopper Key Point

Can be used as both a lunch box and a storage container. Can be stacked and stored in the refrigerator. Made of stainless steel for quick cooling and no odor transfer.

It can also be used in the oven, so it is convenient for baking gratins or doria, putting on the lid, and taking it with you to lunch boxes or camping.

- Can be used in household ovens. (Heat resistant up to 250 °C)
- Please remove the lid when using the oven.
- The packing is removable. Available in gray and brown. Also sold separately.
